

RESOLUTION NO. 2022-32294

A RESOLUTION OF THE MAYOR AND CITY COMMISSION OF THE CITY OF MIAMI BEACH, FLORIDA, ACCEPTING THE ADMINISTRATION'S RECOMMENDATION AND REQUESTING THAT THE FLORIDA DEPARTMENT OF TRANSPORTATION (FDOT) PURSUE THE DESIGN AND IMPLEMENTATION OF DUAL RIGHT TURN LANES ALONG SOUTHBOUND INDIAN CREEK DRIVE, ONTO WESTBOUND 41ST STREET, ALONG WITH ANY OTHER WARRANTED IMPROVEMENTS, AS PART OF THE UPCOMING FDOT ROADWAY IMPROVEMENT PROJECT ALONG SR A1A/COLLINS AVENUE, FROM 44TH STREET TO THE 4700 BLOCK, AND ALONG INDIAN CREEK DRIVE, FROM 41ST STREET TO 44TH STREET; SAID IMPLEMENTATION RESULTING IN THE LOSS OF APPROXIMATELY FIFTEEN (15) EXISTING ON-STREET PARKING SPACES ON THE EAST SIDE OF INDIAN CREEK DRIVE, BETWEEN 43RD STREET AND 44TH STREET.

**WHEREAS**, the Florida Department of Transportation (FDOT) is developing the design for a roadway improvement project along SR A1A/Collins Avenue, from 44th Street to the 4700 Block, and along Indian Creek Drive, from 41st Street to 44th Street, within the limits of the City of Miami Beach; and

**WHEREAS**, the project consists of repaving and restriping the roadway, reconstructing damaged sidewalk, and installing high-emphasis crosswalks at signalized intersections, among other improvements with work expected to begin in September 2023; and

**WHEREAS**, in 2018, the City's Transportation and Mobility Department retained a traffic engineering consultant, AECOM, to conduct a traffic study at six (6) intersections located along Indian Creek Drive, Collins Avenue, and 41st Street to identify any operational issues and develop recommendations to help improve traffic flow in the area; and

**WHEREAS**, AECOM collected traffic data, conducted field observations and prepared operational analyses for various concept alternatives; and

**WHEREAS**, ultimately, the traffic study recommended creating dual right-turn lanes for the southbound approach of Indian Creek Drive onto westbound 41st Street, where currently a single southbound right turn lane exists, among other improvements; and

**WHEREAS**, based on the traffic study, this improvement would increase capacity for the southbound right-turn movements and reduce queueing and rear-end/sideswipe crashes; and

**WHEREAS**, the study findings were shared with FDOT for its consideration and programming as part of a future project; and

**WHEREAS**, during the City's recent Indian Creek Drive reconstruction project, between 41st Street and 26th Street, Indian Creek Drive was completely closed to southbound traffic at 41st Street; and

**WHEREAS**, the temporary Maintenance of Traffic (MOT) plan for the Indian Creek Drive reconstruction project included dual southbound right turn lanes, operating under free-flow conditions, at the intersection of Indian Creek Drive and 41st Street, which significantly helped in managing traffic flow given the full closure of Indian Creek Drive; and

**WHEREAS**, during this time, given that there were only two westbound receiving lanes on 41st Street, all westbound traffic on 41st Street from Collins Avenue to Indian Creek Drive was prohibited, as to not conflict with the free-flow dual southbound right turn movements at the Indian Creek Drive and 41st Street intersection; and

**WHEREAS**, corresponding signal timing changes were implemented to ensure the safe operation of the affected intersections under the temporary MOT conditions; and

**WHEREAS**, once the City completed construction work for the Indian Creek Drive reconstruction project, in March 2022, the roadway was reopened to traffic and the southbound approach of Indian Creek Drive onto 41st Street was reverted to its original condition, a single southbound right turn lane, which has resulted in traffic congestion, that, at times, has extended for multiple blocks north of 41st Street; and

**WHEREAS**, since the opening of Indian Creek Drive, in March 2022, the Transportation and Mobility Department staff has been working closely with FDOT, in pursuing the implementation of dual southbound right-turn lanes at the Indian Creek Drive/41st Street intersection on a permanent basis (the "recommended modifications"), as part of the upcoming FDOT roadway improvement project, along SR A1A/Collins Avenue from 44th Street to the 4700 Block, and along Indian Creek Drive from 41st Street to 44th Street; and

**WHEREAS**, at this time, FDOT is requesting that the City conduct a traffic operational analysis to evaluate the impact of the City's recommended modifications on the surrounding intersections along 41st Street, Collins Avenue, and Indian Creek Drive, as well as to identify any recommended intersection geometry, signal timing, or traffic flow modifications required as part of the reconfiguration; and

**WHEREAS**, based on FDOT's evaluation, implementation of the City's recommended modifications would require some widening and shifting of the existing travel lanes along Indian Creek Drive, north of 41st Street towards the east, which would result in the elimination of approximately 15 existing on-street parking spaces on the east side of Indian Creek Drive, between 42nd and 44th Streets; and

**WHEREAS**, given the impact to on-street parking, FDOT is requiring that the City Commission adopt a Resolution supporting the Administration's recommended modifications, and requesting that FDOT include the recommended modifications on a permanent basis, as part of the upcoming FDOT roadway improvement project, which project is expected to commence construction in September 2023; and

**WHEREAS**, the Administration recommends the implementation of the aforementioned modifications, in that such permanent modifications would have a very positive impact on traffic flow and operational safety at this critical intersection, and such benefit would far outweigh the impact to the 15 existing on-street parking spaces; and

**WHEREAS**, in the interim, the City is pursuing the implementation of the dual southbound right turn lanes on a temporary basis through an FDOT permit, via implementation of an MOT plan similar to the one that was in place during the City's Indian Creek Drive reconstruction project.

**NOW, THEREFORE, BE IT RESOLVED BY THE MAYOR AND THE CITY COMMISSION OF THE CITY OF MIAMI BEACH, FLORIDA**, that the Mayor and City Commission hereby accept the Administration's recommendation and request that the Florida

Department of Transportation (FDOT) pursue the design and implementation of dual right turn lanes along southbound Indian Creek Drive, onto westbound 41st Street, along with any other warranted improvements, as part of the upcoming roadway improvement project along SR A1A/Collins Avenue, from 44th Street to the 4700 block, and along Indian Creek Drive, from 41st Street to 44th Street; said implementation resulting in the loss of approximately fifteen (15) existing on-street parking spaces on the east side of Indian Creek Drive, between 43rd Street and 44th Street.

**PASSED** and **ADOPTED** this 14<sup>th</sup> day of September 2022.

**ATTEST:**

Rafael E. Granado, City Clerk

Dan Gelber, Mayor
